

# Climate Change: Impact on Banks & Role of the Board

## FACULTY

Dr Gary Theseira

## WHO SHOULD ATTEND

- Bank Board of Directors
- Risk Committee Members of Bank Boards
- Chairmen of Bank Boards
- Anyone who might find this program helpful

[www.asb.edu.my/executive-education](http://www.asb.edu.my/executive-education)

Course Fee: RM3,000 before SST

Idlif Executive Education Center

Directors' Education Program

## PROGRAM OVERVIEW

Board of directors are responsible to provide strategic direction as well as oversight of risk management including with regards to climate risks for their organizations. As such, it is incumbent upon all directors to gain a sound understanding of the manifold ways that climate change, directly or indirectly, impacts company profitability as well as the organization's longer-term sustainability. Directors must be aware that the call to climate action involves multi-stakeholder engagement given emerging trends in customer preferences and needs, investor motivation, and new legislation and regulatory frameworks as well as calls for increased transparency and disclosure.

Even before the COVID-19 pandemic, climate change was an emerging risk that had deep and far-reaching impact on the global economy. Both developed and developing economies have incurred substantial loss and damage associated with extreme weather events that have resulted in reduced production, disrupted supply chains and price increases. On top of this, some developed countries and their trade blocs have begun to levy special tariffs on carbon intensive imports on the pretext of addressing climate change. To address these combined impacts, governments and private sector stakeholders are increasingly implementing measures aimed at reducing exposure and risk; as well as to ensure their products and services remain competitive and meet export market eligibility criteria.

This program will provide directors of banks with a broad understanding of the complex and inter-connected issues related to climate change including its causes, impacts, and implications for stakeholders and corporate sustainability in the real economy. The knowledge gained will help directors provide better oversight of the management of climate risks for their organizations.

### **At the end of the program, participants will be able to:**

- Draw from a working vocabulary and comprehension about the science of climate change – its causes and impacts, and the need for a global multilateral response.
- Understand how companies including bank clients can be exposed to direct and indirect climate impacts (physical risk) as well as market and regulatory shifts (transition risk) that can limit participation in, or bar access to markets.
- Understand the critical role of banks in promoting greener and more sustainable portfolios via a robust and comprehensive assessment of proposed economic activities.
- Learn what to look out for in terms of climate risk oversight and how to ask the right questions.
- Learn how to read bank sustainability reports and gain a handle on how to improve transparency through enhanced corporate disclosure.

---

## PROGRAM OUTLINE

---

### **Session 1: The Big Picture and Consequences of Inaction**

This session will provide a broad understanding of the science of climate change – the causes and impacts – as well as the need for a multilateral response. It will highlight the major climate protocols so far – what they aim to do and where we stand currently in terms of climate action.

### **Session 2: Why Should Boards Care?**

This session will focus attention on directors' duties in providing strategic direction and oversight in risk management with regards to climate risks. It will consider expectations from different stakeholder groups (Bank Negara, investors, customers, employees) with respect to climate action and disclosure, as well as sustainable lending and green instruments.

### **Session 3: What Climate Change Means for Banks?**

This session will explore how climate change affects bank lending and operations. The session will go into the details of assessments and measurements as well as key features of the main reporting frameworks. Case studies will be shared.

### **Session 4: International Trends and Implementation Challenges**

The discussion in this session will focus on international trends and their implications. It will examine mechanisms put in place by trade blocs and how they can be expected to impact corporate behaviour with respect to climate action. Sufficient time will also be allocated to discuss the challenge for bank boards in moving the climate agenda forward in their organizations.
